

We want to thank our global family of Zignature pet parents and retailers for your incredible support over these past five days.

Our Company was founded on a simple promise to produce the world's safest pet food products to help pets that have food sensitivities.

As pet parents like you, we are passionately committed to making the highest quality, most nutritious, and safest pet food on the planet. Our goal and devotion is to continue to formulate the world's safest pet food products that help pets with common food sensitivities, remain nutritionally strong, and provide a path for pets to be their happiest and healthiest.

Zignature's thought-leading team of veterinarians, Ph.D. animal nutritionists, and food scientists design our formulas.

Since our founding in 2010, our meticulously designed diets are formulated by Zignature's thought-leading team of veterinarians, Ph.D. animal nutritionists, and food scientists.

Our goal is to ensure we help your canine companion avoid common food sensitivities and keep them safe. To achieve this, we remove common food sensitive ingredients from our formulas such as chicken, corn, wheat gluten, soy, and potatoes. We further add vital supplements such as antioxidants, essential fatty acids, and an exclusively designed custom vitamin and mineral pack.

All formulas are thoroughly tested and researched

We conduct years of rigorous research and testing on all products before they are available to the public. This includes ongoing tests on blood metabolites- including whole blood and blood plasma taurine levels, as well as palatability trials, stool quality tests and digestibility trials. This allows us to formulate the safest and most nutritious pet foods out there today.

Recent studies by Summit Ridge Partners Labs, an industry leader in pet food testing, reveals Zignature provides a healthy and appropriate level of Taurine

Our most recent studies performed by an Industry leader in pet food testing for over 30 years (providing accurate, reliable, and precise research expertise) reveals that Zignature provides a healthy and appropriate level of Taurine through its meticulously designed formulas.

While taurine has always been included in our diets, new studies have shown that extra taurine is important for dogs' cardiovascular health. Zignature further supplements all of its diets with extra taurine and L-Carnitine, providing some of the highest levels of taurine available in the industry. Please see attached image of blood taurine results.

13076	F	07/05/09
13422	M	02/07/12
13095	F	08/29/09

Conclusion Statement:

Body weights, food consumption and stool quality appeared normal throughout the study. Group mean whole blood and plasma taurine levels increased throughout the 28 days of the study, with the group mean plasma levels rising above the normal reference range. The diet provided adequate taurine levels in all animals by the conclusion of the study. Digestibility based on dry matter was 81%. No adverse reactions were observed on study.

13065	M	04/09/09

Conclusion Statement:

Body weights, food consumption and stool quality appeared normal throughout the study. The group mean whole blood taurine levels were similar throughout the study and well within normal limits. The group mean plasma taurine levels increased significantly by Day 28. All dogs on Day 28 had taurine levels that were well within normal limits with a few slightly above. The diet provided adequate taurine to all dogs during the study. Digestibility based on dry matter was 79%. No adverse reactions were observed on study.

Table 11: Animal Information

Dog ID	Sex	DOB
13323	F	05/21/11
13408	M	01/14/12
13531	M	09/08/13
13386	M	10/17/11
13329	F	07/05/11
13237	F	09/25/10
13607	F	07/18/16
2823323	M	03/26/15

Conclusion Statement:

Body weights, food consumption and stool quality appeared normal throughout the study. During the study the group mean whole blood taurine levels increased at each measured time point throughout the study, exceeding the normal reference ranges. The group mean plasma taurine levels increased above the normal reference range from Day 0 with the values essentially remaining the same on Day 14 and Day 28. The diet provided adequate taurine levels in all animals during the study. Digestibility based on dry matter was 81%. No adverse reactions were observed on study.

Blood Test General Conclusion Statement

Body weights, food consumption and stool quality appeared normal throughout the study. During the study the group mean whole blood and plasma taurine levels increased or stayed the same from Day 0 to Day 28. Whole blood and plasma taurine values for each dog were within optimal reference ranges while the animals were consuming the diet.

We have great confidence in our naturally sourced grain-free diets

As we continue to have great confidence in our naturally sourced grain-free diets that meet the needs of dogs with food sensitivities, we want to provide an additional line developed by our expert formulation team that is a nutritionally sound and grain-inclusive recipe, with oats and quinoa. Trout & Salmon Meal Recipe, Lamb Recipe and Turkey Recipe will be our first three formula we launch in the coming months. We will add more Recipes as you ask for them.

We feel as a partner to our pet parents, it is important for us to listen and understand our valued extended family's needs and offer a variety of pet foods that satisfy your four-legged family member's needs.

We will continue to invest heavily in pet food testing and research to do whatever it takes to keep your pet safe

This company was founded out of a passion and commitment to pet health and we care deeply about animals. We continue to invest heavily in our own research to ensure we continue to make the safest and highest quality pet food on the market today to keep your dog safe and healthy. If you have any questions about our formulas or anything else, we encourage you to reach out to us directly at contact@pets-global.com so we can connect you with one of our resident expert pet nutritionists or veterinary research scientists to discuss together.
